

ANES ABDUL KALAM

AI & ROBOTICS ENTHUSIAST | BCA STUDENT (AI, ML, ROBOTICS, IOT)

+91-81368-20933 - anzz.anas.11@gmail.com - <https://anzz-11.github.io/web/> - www.linkedin.com/in/anzz

PROFILE

A highly motivated Bachelor of Computer Applications (BCA) student specializing in Artificial Intelligence and Robotics. Passionate about developing intelligent systems that integrate AI and automation to solve real-world challenges. Experienced in working on AI-driven projects and robotic applications, with a strong interest in autonomous systems, machine learning, and computer vision. Dedicated to advancing innovation in robotics and AI to create smarter, safer, and more adaptive technologies that enhance everyday life and industry efficiency.

SKILLS

- **Programming:** Python, Java, C, MySQL, HTML, CSS
- **AI/ML & Computer Vision:** Machine Learning, YOLO, TensorFlow, Computer Vision, Stable Diffusion, Prompt Engineering
- **Frameworks & Web Development:** FastAPI, Django, Flask, REST APIs
- **IoT & Robotics:** Arduino, ESP32, Raspberry Pi, IoT Systems, Protocols
- **Data & Visualization:** Power BI, Data Analytics, Data Visualization
- **Tools & Platforms:** OpenCV, AWS IoT Core, Azure, Git, GitHub
- **Soft Skills:** Teamwork, Time Management, Critical Thinking, Leadership, Communication

CERTIFICATIONS

- Microsoft AZ 900
- Microsoft SC 900
- Microsoft DP 900
- Microsoft AI 900
- AI & ML with Python & Azure Certificate
- Data Science & Analytics with Python & Azure Certificate

ACHIEVEMENTS

- 5+ AI/ML Projects built and deployed independently
- 4 Microsoft Certifications — AZ 900, SC 900, DP 900, AI 900
- 500+ Students trained via workshop on AI, ML & Robotics.
- 30-Hour Professional Training — AI, ML & Data Analytics (Azure & Python)

EDUCATION

Bachelor of Computer Applications (BCA)

Specialization In: Artificial Intelligence, Machine Learning, Robotics & IoT

Yenepoya University, Karnataka, India (2023 - 2026)
Percentage - 92

EXPERIENCE

Inker Robotics Pvt. Ltd. — AI/ML & Robotics OJT

- Developed AI-based systems including a robot with voice and facial recognition, an autonomous vehicle, and an interactive vision-based application.
- Applied computer vision, machine learning, and embedded systems for real-time implementation and deployment.

AI, ML, Data Science & Analytics (Azure & Python) — Training Program

- Completed a 30-hour training program on AI, ML, and data analytics using Azure and Python.
- Gained practical experience in data analysis and machine learning model development.

PROJECTS

- **AI Sketch-to-Image Generator** – Converts hand-drawn sketches into realistic images using Stable Diffusion and ControlNet.
GitHub: <https://github.com/anzz-11/Sketch-To-Image>
- **Surveillance Bot for Army** – Autonomous robot using YOLO and Raspberry Pi for real-time threat detection and navigation.
GitHub: https://github.com/anzz-11/Surv_bot
- **YOLO Face Detection System** – Real-time face detection with Flask streaming and voice alerts using YOLO.
GitHub: <https://github.com/anzz-11/Facial-Recognition>
- **AWS DeepRacer Autonomous Car** – AI-powered self-driving car using CNN for real-time navigation and obstacle avoidance.
GitHub: https://github.com/anzz-11/AWS_DEPPRACER
- **Robot Voice Assistant** – Voice-enabled AI assistant with wake-word detection using local LLaMA models.
GitHub: https://github.com/anzz-11/Robot_Voice
- **Laptop Price Prediction Dashboard** – Developed an end-to-end machine learning project for laptop price prediction using data cleaning, exploratory data analysis (EDA), feature engineering, and regression models. Created an interactive dashboard for data visualization and price insights using Python and Power BI.
